

OmegaSuperUndercoat (series 65)

*Solvent base pigmented penetrating undercoat
Ideal for chalky substrates*

CHARACTERISTICS	A high quality oil rich alkyd enamel undercoat applied over old chalky substrates to provide advanced and reinforced base for further coating. This type of undercoats absorbed deeply into chalky surfaces depending on high rich oil formulation. It is used for interior and exterior surfaces of wood, masonry, walls, ceiling, concrete, putty fillers, and gypsum boards.		
SURFACE PREPARATION	Surface generally must be clean, dry, free from all defective or poorly adhering material, dirt, and grease, wax etc. previously painted surfaces should be thoroughly rubbed down using a suitable abrasive paper and then dusted off.		
APPLICATION	Can be done by brush, roller or airless spray.		
THINNING	Use mineral spirit up to 30% for brush or roller application and up to 35% for airless spray application.		
COVERAGE	In normal application 50 – 70 meters square per U.S. Gallon for one coat, depending on texture absorption, paint film thickness and condition of the surfaces.		
DRYING TIME	Dry to touch (Dust Free)	4 – 6	Hours.
	Dry to re-coat	12 – 24	Hours.
	Dry to handle	36 - 48	Hours.
