

OmegaUndercoat (series 70)

*High quality pigmented solvent base undercoat
For exterior & interior use*

CHARACTERISTICS	A high, alkyd enamel undercoat designed as an intermediate coat to prepare surfaces for application of wood, masonry and metal surfaces. It produces a smooth tightly sealed coat that insure excellent inter-coat adhesion for new painting coats, non-toxic, resistant to alkalinity of concrete and extreme durability. For exterior and interior new or repaint works of wood, metal, masonry surfaces and putty works.		
SURFACE PREPARATION	Surface generally must be clean, dry, free from all defective or poorly adhering material, dirt, and grease, wax etc. previously painted surfaces should be thoroughly rubbed down using a suitable abrasive paper and then dusted off.		
APPLICATION	Can be done by brush, roller or airless spray.		
THINNING	Use mineral spirit up to 30% for brush or roller application and up to 35% for airless spray application.		
COVERAGE	In normal application 50 – 70 meters square per U.S. Gallon for one coat, depending on texture absorption, paint film thickness and condition of the surfaces.		
DRYING TIME	Dry to touch (Dust Free)	2 – 4	Hours.
	Dry to re-coat	4 – 8	Hours.
	Dry to handle	12 - 24	Hours.
